***The Purpose of the Committee on Busing and Safety*** provides district-wide, advisory oversight of students using all modes of transportation other than transportation provided in a parent's private vehicle. The committee is also charged with advisory oversight of student safety in and around District 75 schools. We advocate for parents, caregivers as well as school personnel where student busing and student safety are concerned. We disseminate pertinent information relating to these issues, recommend changes to chancellor rules and regulations, and, when necessary, recommend legislative changes to New York State statutes.
